CONFERENCE DESCRIPTION

Our conference on ***Emergencies in Pediatrics*** focuses on many of the dilemmas facing Pediatric and Emergency Medicine health care professionals. The goal of this conference is to increase participants' knowledge and enhance competence in managing many pediatric emergency dilemmas. Participants will be able to apply new knowledge and skills immediately to clinical practice through participation in lectures and discussions about pediatric illnesses and injuries. This conference is for physicians, nurse practitioners, physician assistants and nurses involved in treating the pediatric patient.

Topics in this year's conference have been selected based on extensive target needs assessment data resulting from professional practice gaps. These gaps are identified by a variety of sources including feedback and evaluations from past participants, clinical expert input, Symposia Medicus online survey, and other medical and nursing data.

An outstanding faculty has been assembled for this conference, with presenters who are committed to providing participants with current and practical evidence-based information. Faculty members were selected based on their individual areas of expertise, their ability to communicate first-hand knowledge to others in a clear and concise manner, their commitment to address issues of current concern, and their willingness to interact with participants.

Your participation in this conference will provide you the opportunity to share current ideas with colleagues from across the country, amidst the excitement of New York City during the holiday season.

CONFERENCE OBJECTIVES

After participating in this conference, you should have an increased knowledge of, and be more competent to...

- Provide appropriate management for pediatric head trauma and seizures
- Diagnose and manage life-threatening rashes in children
- Provide appropriate management for acute asthma and allergic emergencies
- Recognize and manage common sports-related injuries in the pediatric patient
