Conference Description

Our **11th Annual Winter Conference on Pediatric Emergencies** focuses on many challenges facing Pediatric and Emergency health care professionals. The goal of this conference is to increase participants' knowledge and enhance competence in managing common pediatric emergencies. Participants will be able to update and apply their knowledge and skills immediately to clinical practice through participation in lectures, case presentations and discussions about illnesses and injuries specific to the pediatric population. This conference is targeted at physicians, nurse practitioners, physician assistants and nurses involved in the clinical care of children.

Topics for this year's conference have been selected based on extensive target audience needs assessment data resulting from professional practice gaps. These gaps are identified by a variety of sources including feedback and evaluations from past participants, clinical expert input, Symposia Medicus' online survey, and other medical and nursing data.

Our outstanding faculty has been selected based on their individual areas of expertise, their ability to communicate first-hand knowledge to others, and their commitment to address issues of current concern to attendees.

Three morning sessions and two afternoon sessions leave ample time for skiing and exploring Breckenridge, Colorado. We have also arranged group tours that allow for enjoyment of the area, as well as continued discussion with colleagues.

Conference Objectives

After participating in this conference, you should have an increased knowledge of, and be more competent to:

- Recognize dermatologic emergencies in children
- Identify presenting signs & symptoms of common neurological emergencies in children
- Identify common pitfalls in diagnosing pediatric orthopedic injuries
- Develop a comprehensive plan for the management of respiratory emergencies, such as severe asthma
- Manage injuries and infections of the eye in pediatric patients
