Conference Description

Our **18th Annual Winter Conference on Obstetrics & Gynecology** has been designed for physicians, certified nurse midwives, nurse practitioners, physician assistants, nurses and other health care professionals who face ever increasing challenges in the clinical diagnoses, treatment options, new technologies, and malpractice liability issues involved in Obstetrics and Gynecology.

The goal of this conference is to present current clinical data on key issues in obstetrics & gynecology, along with treatment options to manage these challenges. Topics for this year's conference have been selected based on extensive target audience needs assessment data resulting from professional practice gaps. These gaps are identified by a variety of sources including feedback and evaluations from past participants, clinical expert input, Symposia Medicus' online survey, and other medical and nursing data.

Our outstanding faculty has been selected based on their individual areas of expertise, their ability to communicate first-hand knowledge to others, and their commitment to address issues of current concern to attendees.

Three morning sessions and two afternoon sessions leave ample time for skiing and exploring Beaver Creek, Colorado. We have also arranged group tours that allow for enjoyment of the area, as well as continued discussion with colleagues.

- Select the best contraception option for your patient
